

[\(click to jump to instructions with screenshots\)](#)

Basic Instructions:

Once the project is open in your IDE, add **private.js** (JavaScript file we submitted to Blackboard along with our Project Submission) to the **server** folder.

(private.js connects to the database and we do not want that publicly available on GitHub)

From terminal:

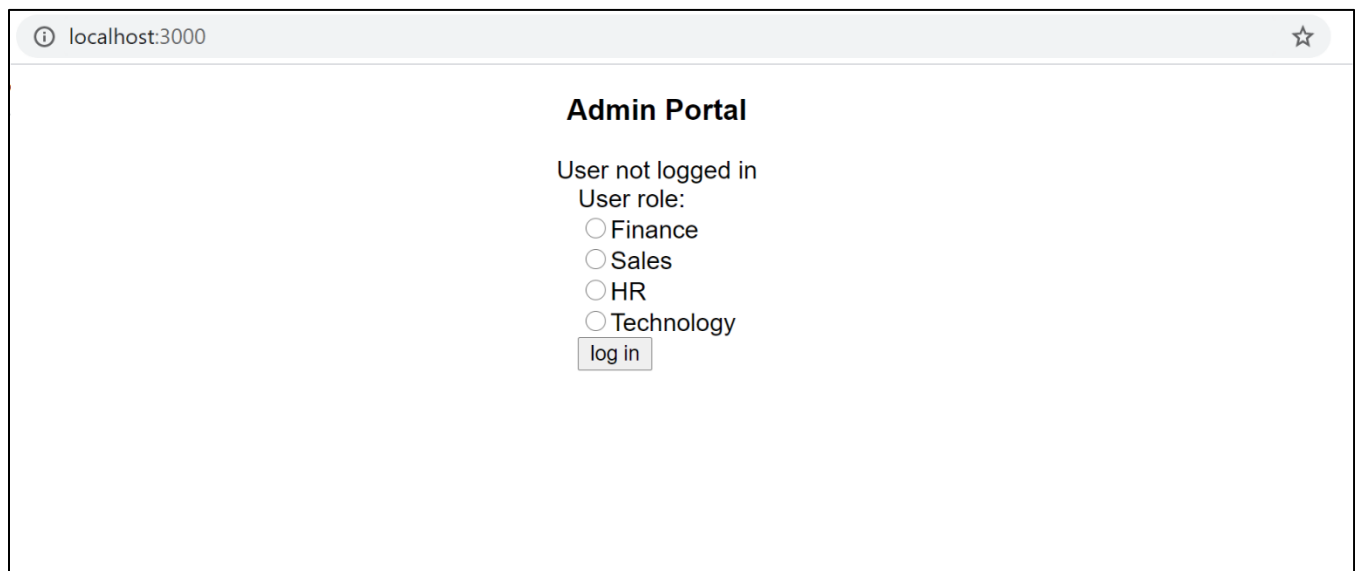

1. Navigate to the project's **server** folder
2. Run **npm install**
3. Run **npm start**

Open 2nd terminal...

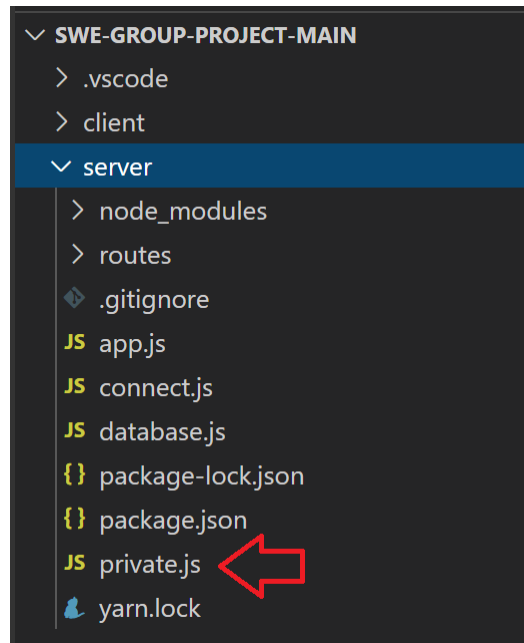

From 2nd terminal:

4. Navigate to the project's **client** folder
5. Run **npm install**
6. Run **npm start**
